

# Do you want to work on future In-Car Communication?

—  
Bachelor Thesis, Master Thesis, or Internship

The SECAN-Lab from the University of Luxembourg addresses both fundamental and applied research in computer networking and security. Our lab is looking for students in cooperation with other universities with a strong interest in real-time networking protocols, in-car communication, and want to get their hands dirty. We are working very closely with industry partners (e.g. Honda) and can provide monthly allowance of 850 €. It would be an advantage to have some of the following interests and skills: Linux, programming in Python or C++, setting up computer networks and open source. Basic knowledge on electronics will be an asset. You should speak English fluently. We want to hear from you!

(Interested students should send a CV to: [ridha.soua@uni.lu](mailto:ridha.soua@uni.lu), [ion.turcanu@uni.lu](mailto:ion.turcanu@uni.lu), and [florian.adamsky@uni.lu](mailto:florian.adamsky@uni.lu))

Deadline: 30.09.2018
