Japan: First Mover
PM Mori

u-Japan 2005

Basic u-Japan Concept

MIC

u-Japan is the next generation ICT society from 2010

u-Japan (Ubiquitous Japan)

Ubiquitous

Connects everyone and everything

- An easy-to-use network anytime, anywhere, with anything and for anyone.
 - ICT will be everywhere in daily life for a user-friendly society
- Person2Person plus Person2Goods, and Goods2Goods
 - In every aspect, communication will take the more important role in society

Universal

User-friendly

- Gentle with people
 - Can be used by anyone without thinking of the equipment or network
 - The aged and disabled will be able to participate in society with ICT
- Interaction
 - A heart to heart interaction overcoming barriers between generations and localities to create togetherness

User-oriented

From the user's point of view

- Close to the user
 - For a society that is user-orientated than a society where objects are given by the supplier
 - Developing technologies and services that are connected to our needs

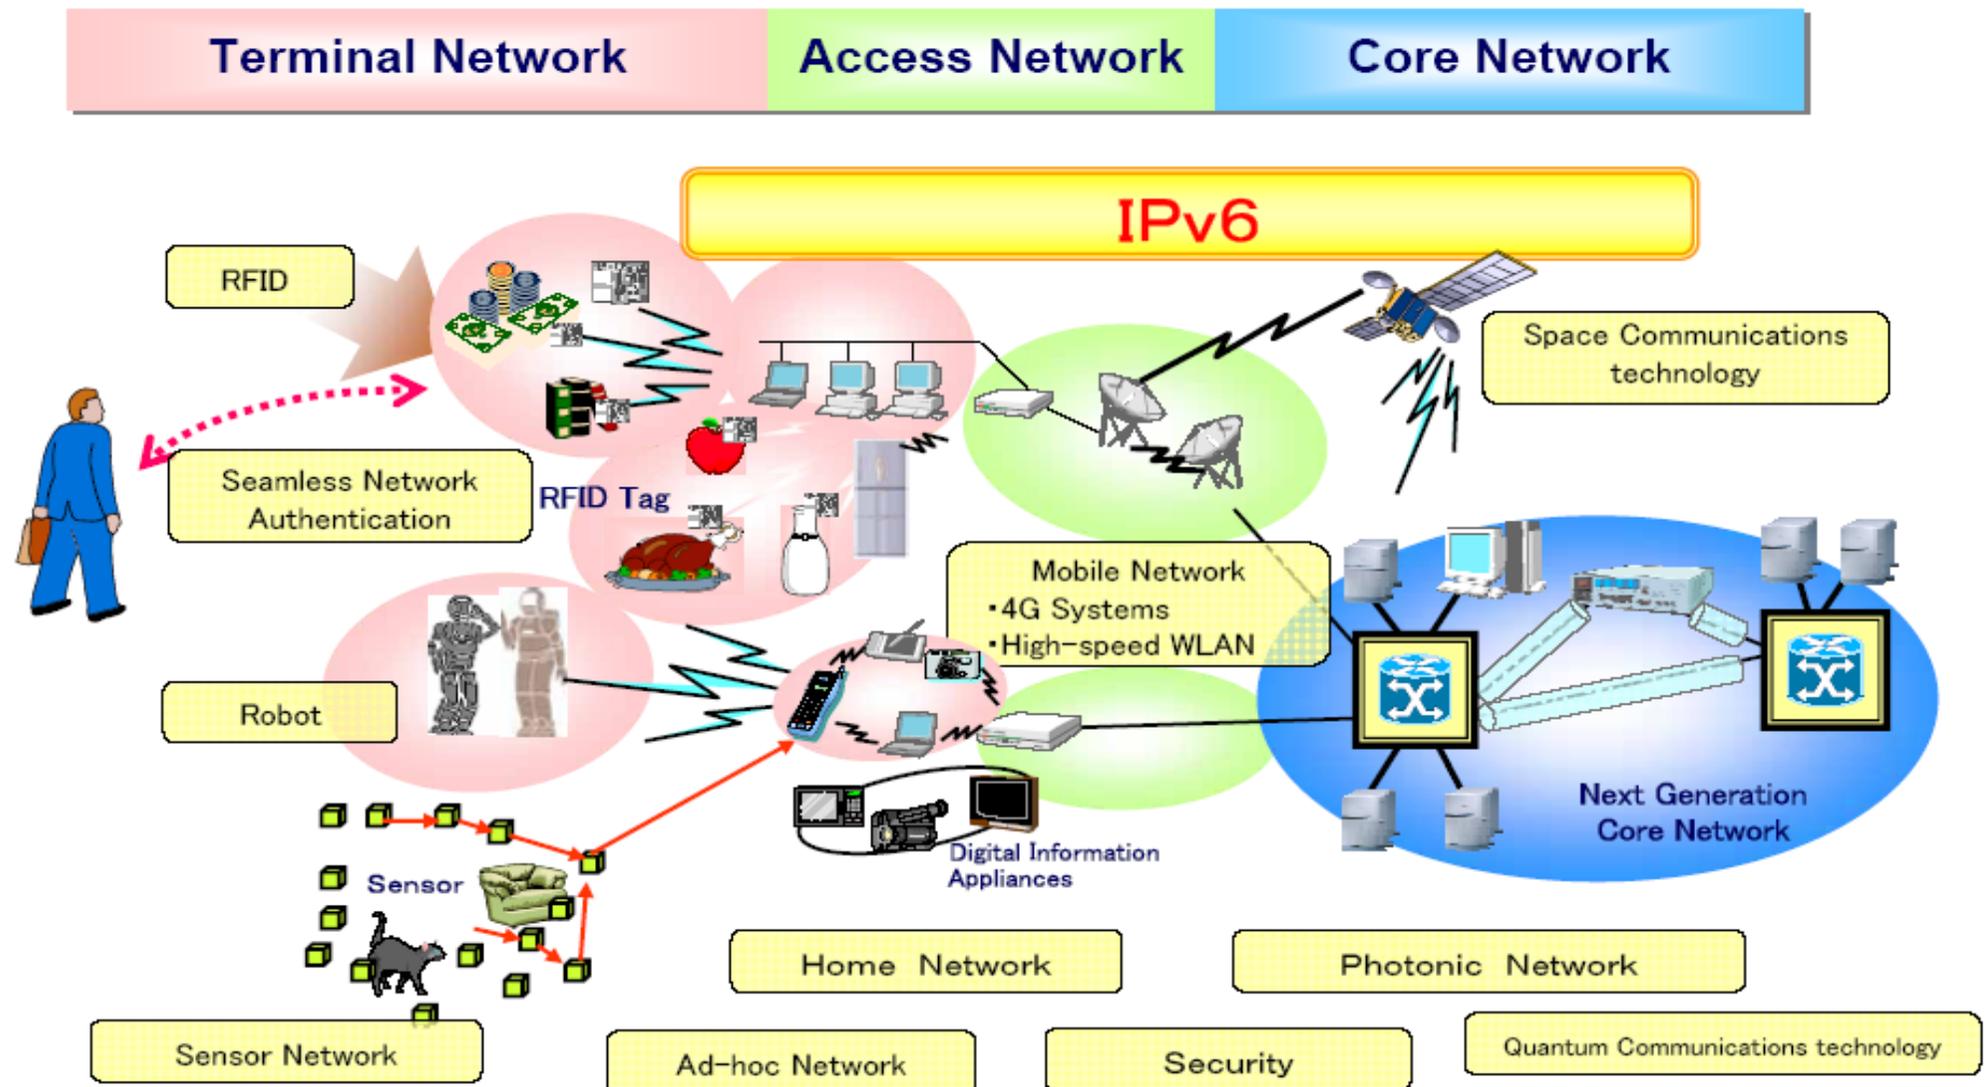

Unique

Be something special

- Create individual energy
 - A new society where your dreams come true
- Vitalize the society
 - Create new social systems and business services
 - Get out from the norm and realize local revitalization with creativity

Technologies for the Ubiquitous Network Society
